RESPONSE PROTOCOL IN CASE OF POSITIVE TEST OR SUSPECTED CASE OF COVID-19

All Covid-19-related information will follow in due time, because of the uncertainties and the constantly altering measures.

If I am feeling ill

If you have a cough or a temperature, stay at the hotel, avoid contact with others and call the COVID-19 Outbreak Response Coordinator Doctor.

You should take a test as quickly as possible.

If you have the virus, you must self-isolate for seven days from the first symptoms. If you still have a temperature, you must self-isolate for a further 48 hours.

If you have a cough and/or a temperature, and you have difficulty breathing and/or you are feeling faint, dial 15 or call or send a text to 114 if you have a speech or hearing impairment.

If I have the virus

If you have the virus, you must self-isolate for seven days from the first symptoms. If you still have a temperature, you must self-isolate for a further 48 hours.

If you have the virus but no symptoms, you must self-isolate for seven days from the time you took the test.

If I have been notified that I am a contact case

You must self-isolate for 7 days from the last time you were in contact with the person who has the virus. At the end of that time, you should take a test. If you live with the person who has the virus, you should take a test immediately. Contact a test centre to make an appointment.

After the test, go straight home and self-isolate until you have the result.

In any case (symptoms or positive test) the team manager has to inform immediately the COVID-19 Outbreak Response Coordinator Doctor and the Technical Delegate.

The person suspected must be immediately placed in a separate room and kept away from the event.
